

GEZE Perlan 140

A wide range of applications with individual accessories

The unobtrusive design supports any desired effect and turns the sliding system with its wide range of accessories into a guarantee for elegant and customised solutions. Even heavy doors are child's play to open. The Perlan 140 provides long-term quiet running due to two precision ball bearings per roller carriage, track design and large carrier rollers. The interior, sealed ball bearings provide corrosion protection for slightly humid interiors, making them suitable even for bathroom doors. The track in anodised alloy material reduces abrasion and also provides increased corrosion protection. The profile has no awkward edges, and all the accessory parts run in the track making Perlan 140 just perfect for installation in visible areas. The distance between the leaf and the wall can be adjusted using the wall attachment bracket, which permits the door to be adjusted to individual situations, e.g. for precise installation of the track where masonry is uneven.

There are numerous complete sets available for a wide range of different applications. These always include all the parts necessary for setting up the sliding door: tracks in different lengths as well as matching fixing brackets e.g. for wall installation, roller carriages, carrier plates, tube buffers and floor guide. Alternatively, the track (length 6 m or cut to size) and the accessories can be ordered separately. The track is also available in a curved version on request.

GEZE Perlan 140

GEZE Perlan 140

Application range

- For wood, plastic, glass and metal leaves up to 140 kg leaf weight
- Diverse additional parts are available for glass doors, e.g. glass clamping plate, fixed panel holders or GGS holders
- For all single, multi-leaf and synchronous sliding doors
- Straightforward, direct ceiling mounting or mounting using brackets on wall and ceiling
- The smooth running and use of high-quality materials as well as the quality workmanship make it especially suitable for doors in highly frequented residential and office areas

Technical data

Product features	GEZE Perlan 140
Door material	Wood, Plastic, Metal, Glass
Leaf weight (max.)	140 kg
Corrosion protection class	2
Type of installation	Wall installation, Ceiling installation
Telescope	•
Automated	•
Fixed panel	•
Draw-in damping	• max. 80 kg

Classification according to EN 1527:2013

GEZE Perlan 140								
Category of use	Durability	Door weight	Fire resistance	Safety	Corrosion resistance	Security	Category of door	Initial friction
-	6	3	-	1	2	-	1	3

A DESCRIPTION OF THE CLASSES IS GIVEN AT THE END OF THE CATALOGUE.

Standard width in mm

Leaf width (FB)	Track length (L)	Hole spacing (t)	Number of wall and ceiling brackets (x)	Distance from end of track to centre of hole of fixing bracket (y)
500 - 840	1650	350	5	125
500 - 1040	2050	350	6	150
500 - 1240	2450	350	7	175
500 - 1440	2850	350	9	25
500 - 1640	3250	350	10	50
Standard length	6000	350	18	25

Note

The wall recesses must be made accessible by a removable cover. The door leaf must be stopped by a further angle buffer – in addition to the tube buffer. The buffer must be attached at the mid door height!

Planning drawings

Drawing No. 10421-pl-01 + 10421-pl-03 (vertical sections)

A = Perlan 140 with glass clamping plate, recessed handle, individually covered without glass cut-outs

B = Perlan 140 with glass clamping plate, recessed handle, individually covered with glass cut-outs

C = Perlan 140 with glass clamping plate, recessed handle, individually covered with glass cut-outs

Note: Position of the glass clamping plate changes if SoftStop is used, see planning drawing No. 10421-pl-12.

Dimensioning as with A

- SH = Panel height

Standard installation

Drawing No. 10421-ep05

Mounting on a 1-leaf sliding door with wooden leaf and carrier plate (manual):

1 = Wall attachment bracket Perlan 140

2 = Double roller carriage

3 = End cap (optional)

4 = Tube buffer

5 = Hold-open spring

6 = Suspension bolt

7 = Carrier plate

8 = Floor guide

L = Track length

y = Distance end of track to centre of first drilled hole

t = Hole spacing

FB = Leaf width

FH = Leaf height

The fitting can be fixed directly on the ceiling or fixed to the wall or ceiling using an angle bracket or plate:

Direct ceiling mounting
FH = Leaf height
BRH = Overall height

Wall mounting with angle
FH = Leaf height
GH = Total height

Ceiling installation with plate
FH = Leaf height
BRH = Overall height
1 = Ceiling attachment angle Perlan 140

Installation with lowerable carrier plate

Drawing No. 10421-ep06

Mounting on a 1-leaf sliding door with wooden leaf and lowerable carrier plate:

- 1 = Wall attachment bracket Perlan 140
- 2 = Double roller carriage
- 3 = End cap (optional)
- 4 = Tube buffer
- 5 = Hold-open spring
- 6 = Tube buffer adjustable in the track
- 7 = Floor guide
- 8 = Min. recess for wooden leaf
- L = Track length
- y = Distance end of track to centre of first drilled hole
- t = Hole spacing
- FB = Leaf width
- FH = Leaf height

Ceiling compensation set/ceiling spacer, stepless 6 pcs., continuously variable height compensation from 13 mm to 18 mm. For ceiling mounting using clip-on cover 100/145 as well as for general use on uneven ceilings				138099

GEZE Perlan 140 (Photo: Dirk Wilhelmy)

GEZE Perlan 140 accessories

Glass floor guide with variable adjustment

The floor guide is suitable for glass thicknesses between 8 mm and 12 mm and can be simply and precisely infinitely adjusted.

Adjustable hold-open device

A headless screw is used for individual catch force setting of the hold-open device. This means individual adaptation to the door leaf used (depending on door weight) and respective door user is possible.

End cap

The push-on end cap gives the track a clean end.

Concealed carrier plate

The distance between the rail and the door leaf is minimised by the suspension being concealed in the wooden leaf. Visible carrier plates are a thing of the past, and on-site wooden cover panels are no longer required.

Stainless steel floor guide version

Adjustable glass floor guide EV1

Adjustable hold-open device

End cap

Ceiling compensation set/ceiling spacer, stepless

Drawing No. 10421-ep06

Concealed carrier plate

GEZE GLASS CLAMPING PLATE

GEZE glass clamping plate 45 mm

Inconspicuous and easy to install

The GEZE glass clamping plate offers increased mounting convenience without the need for time-consuming glass work. The individual clamping plates can be covered or both patches can be concealed with a continuous cover. By completely covering the carrier plates, the visual effect is that of a continuous clamping plate, which is also available in all RAL colours. The gap between the clamping plate and track is hardly visible and there is no need to fit a cover on site. The glass clamping plate can be used for all standard glass thicknesses. The clamping plate can be set to the respective glass thickness using the inside gearing. This facilitates installation and dismantling considerably.

GEZE glass clamping plate 45 mm

GEZE glass clamping plate 45 mm

- 1 = Cover profile
- 2 = Inside gearing
- 3 = End cover
- 4 = Glass clamping plate
- 5 = Glass pane

Application range

- For all GEZE sliding systems
- For ESG (toughened safety glass) 8, 10, 12 mm as well as laminated safety glass up to 12.76 mm with additional laminated safety glass adhesive kit (without glass preparation) and wooden leaf
- For leaf weights up to 140 kg (Rollan up to 80 kg)

Standard installation of Perlan 140 on glass leaves

Drawing No. 10421-ep07

Note

The wall recesses must be made accessible by a removable cover. The door leaf must be stopped by a further angle buffer – in addition to the tube buffer. The buffer must be attached at the mid door height!

Mounting on a 1-leaf sliding door with glass leaf and carrier plate (manual):

- 1 = End cap (optional)
- 2 = Wall attachment bracket Perlan 140
- 3 = Tube buffer
- 4 = Hold-open spring
- 5 = Double roller carriage
- 6 = Clamping plate
- 7 = Adjustable floor guide
- L = Track length
- y = Distance end of track to centre of first drilled hole
- FB = Leaf width
- FH = Leaf height
- n = Quantity
- t = Hole spacing

Can be fixed directly or with a plate on the ceiling or a bracket on the wall:

Direct ceiling mounting
SH = Panel height
GH = Total height

Wall mounting with angle
SH = Panel height
GH = Total height

Ceiling installation with plate
SH = Panel height
GH = Total height
1 = Ceiling attachment angle Perlan 140
2 = Thickness of glass
