

## GEZE Perlan 140 SoftStop

### Gentle closing with protection against entrapment

GEZE sliding systems with Perlan 140 SoftStop draw-in damping perfectly combine comfort, convenience and safety for sliding doors. Uncontrolled stopping at the frame or the buffer is now a thing of the past. The door is braked gently and automatically returns to the zero position. The gentle draw-in to the end position is easy on the door and the fitting and increases the door's life. With a total height of only 40 mm, Perlan 140 SoftStop is completely concealed in the track. The draw-in damping also acts as entrapment protection, as the door's movement is braked over the last centimetres of closing. GEZE Perlan 140 SoftStop is available as a standard for leaf widths between 515-1700 mm and leaf weights up to 80 kg.

The set contains a Perlan 140 SoftStop roller carriage for one or double-sided damping. The standard set also includes 1 or 2 carrier hooks including fixing screws, 2 track buffers, 2 suspension bolts as well as 2 carrier plates.
